TITLE: AUTOMATIC SUCTION STRUCTURE OF A VACUUM CONTAINER

## PRELIMINARY AMENDMENT

Commissioner for Patents P. O. Box 1450 Alexandria, VA 22313-1450

Sir:

In conjunction with the filing of the present application, and prior to an initial Official Action on this matter, please amend the above-identified application as follows:

## Preliminary Amendment: SPECIFICATION AMENDMENTS

In Paragraph [0023], please amend the paragraph as follows:

The embodiment of the present invention described above is to be regarded in all respects as being illustrative and nonrestrictive. Accordingly, the present invention may be embodied in other specific forms without deviating from the spirit thereof. The present invention is therefore to be limited only by the scopes scope of the following claims.

## IN THE ABSTRACT

On page 8, please amend the Abstract as follows:

A vacuum container comprises includes an automatic suction structure mounted in a cap of the vacuum container for drawing air out of the hollow interior of a container body. The suction structure comprises includes an electric suction device, a detecting device, a monitoring device, and a releasing device. The suction device is used to create a vacuum in the hollow interior of the container body. The detecting device is used to detect the leak between the cap and the container body. The monitoring device is intended to monitor the vacuum state in the hollow interior of the container body. The releasing device is used to enable the cap and he the container body to be separated from each other.
